

CAM Release Notes

Sprint 2021.02.1.1

04/16/2021

Enhancement

Data Uploader

- CAM allows you to select or deselect all the added scripts for SQL/ Active Directory/All at once to run. [Read more...](#)
- CAM now supported to specify multiple database name in the value field in AD-mapping that allows you to generate multi-input CSV, or multi- delta CSV respectively.
e.g. – Format: "Database1|Database2|Database3"
Note: This multi valued database property is applicable only for iMange system. [Read more...](#)

Resolved Issues

Account Management

- Users were received verification email when updating user details using CSV job upload (Cloud-9287)

Data Uploader

- Failed to load “Accept Header” when API sends request to CAM in data uploader (Cloud-8781)

Document

- Failed to search documents through API as well database search for incorrect RDS instances in the document tab. (Cloud-8819)

Request Workflow

- Could not display all results for client value and matter value while creating workspace if set look up metadata value to internal in request workflow. (Cloud-9226,9276)

Known Issues

- Folders copied from one template to another retain a link to previously created folders using that template. (Cloud-8208)

CAM Release Notes

- Could not delete 'Saved Search' folders from Apply to workspace and Reassign template. (Cloud-8614)

Notes

Prosperoware does not recommend using non-alpha-numeric or special characters within metadata fields. The following special characters include: "?" | "=" | ", ". The iManage API may not return any results when searching for workspaces or documents containing this metadata.
